- Innovative approaches to supporting parents and caregivers
- Localizing the response, and building an evolving response

VOICE

‘Values, Opinions, and Insights of Children
(and their Caregivers) on E-Safety’

An initiative of ECPAT International, Eurochild and Terre des
Hommes Netherlands in the framework of Down to Zero

Framing the Conversation

- **Goal:** Bring the voices of children, parents & caregivers to policymakers on child safety online.
- **Implementing organisations:** ECPAT International, Eurochild, and Terre des Hommes Netherlands in the framework of the Down to Zero project funded by the Dutch Government and their national partners.
- **Location:** 10 EU countries + 3 Asian Countries + 2 Latin American Countries
- **Activities:** 45 focus groups with children aged 12-17 + 15 parental surveys.
- **Status:**
 - Focus Group Discussions with 316 children so far, incl. 19 in **the Philippines** and 27 in **Thailand**
 - Online survey of 6604 parents and caregivers, incl. 508 in **the Philippines** and 501 in **Thailand**

Perception and Reality

- Parents rate themselves highly for knowledge of children's safety (8.6/10 in PH and 8.3/10 in TH)
- 94% say they are aware or completely aware of their children's online behaviour
- Over 50% of caregivers (TH: 62%, PH: 53%) think it's easy for children to talk to them about what happens online
- 62% of Thai parents and 53% of Filipino parents think it's easy for children to talk to them about online issues

And yet...

- 44% of children in Thailand and 37% of Filipino children think it's easy to talk to their parents about online issues
- Gap between feeling they can tell parents, and actually doing so:
 - Fear of the consequences
 - Parents
 - Children filter what they tell parents, focusing on 'really bad things' only

Awareness

- 50% of caregivers do not know how to answer the question to what extent do you think your children feel safe from online sexual abuse
 - In Thailand, 81% of parents say children are safe to very safe
 - In the Philippines, 75% say children are safe to very safe
- Globally, 48% of caregivers agree that current safety measures are sufficiently protecting children from online sexual abuse (23% neutral, 26% disagree)
 - In Thailand 64% agrees, 13% is neutral and 22% disagrees
 - The Philippines, 79% agrees, 7% neutral and 13% disagrees.
